Sitansu Sekhar Mohanty

Adaptable Developer with strong background in crafting innovative software solutions. Proven track record in streamlining processes, enhancing user experience, and delivering high-quality code. Adept at collaborating with cross-functional teams to drive project success and achieve business goals. Committed to continuous learning and staying current with emerging technologies.

Experience

Associate technical Consultant
Mastek

- Facilitated seamless migration of data from client servers to Oracle data server, employing automation techniques.
- Expertly filtered and extracted pertinent information using Python, enhancing efficiency and accuracy in data processing.
- Proficiently developed robust business logic using Java's Groovy rule, improving overall system functionality.

Education

Master Of Computer Application
Lovely Professional University
Aug 2020 - Dec 2022

Projects

BudgetBuddy

- This web app helps users manage their personal finances easily. Built with React, it
- allows users to track their income, expenses, and set budget goals. The app uses React
- Router for smooth navigation between different sections like expense history and
- category management. It also gives real-time notifications using React Toastify, making
- the user experience more interactive. The design is responsive, adapting to different screen sizes, and it uses Heroicons for clean visuals.

Search Flix

- "Search Flix GPT" is a dynamic web application I developed, leveraging React, Redux, React Router, and TailwindCSS. It offers an immersive movie search and browsing experience, showcasing my expertise in web development and user-centric design. The integration of GPT enhances movie search capabilities, setting this project apart as acutting-edge contribution to the digital space.

Certifications & Courses

Namaste React Course

I deep dived into a range of essential skills, including:
- React Bundler: Mastered the art of bundling in React to optimize performance and user experience.
- Tailwind CSS: Leveraged the power of Tailwind CSS to create stunning and responsive user interfaces.
- Redux Toolkit: Delved into Redux Toolkit for state management, ensuring data flows predictably throughout my app.
- Parcel: Explored Parcel as a bundler, streamlining my development process and enhancing productivity.
- Lazy Loading: Implemented lazy loading to boost performance by loading content only when needed.
- Shimmer UI: Crafted a delightful user experience with Shimmer UI for graceful content-loading transitions.
- React Router: Mastered dynamic client-side routing using react-router-dom.
